Forecast for Thursday 17 Jun 2021

Weather: Cloud increasing from the south overnight into Thursday will herald an area of thundery showers moving north across parts of Southern England, although these are unlikely to affect the Brecon Beacons, there is a risk of the odd isolated shower, which potentially could be heavy and thundery in nature during the morning. The shower risk diminishes markedly from mid-morning with sunny spells developing widely across the area. Remaining dry with long sunny spells throughout the afternoon and into the overnight period.

Chance of cloud free mountain/hill tops above 600m: 50% increasing to 80% during the afternoon.

Visibility: With cloud bases above summits, visibilities will be generally good to very good, however sudden deteriorations are possible during the morning given the chance of showers.

Meteorologist's View

Showers with a risk of thunder during the morning are likely to make walking conditions challenging at best. Conditions improve during the day with long sunny spells develop, however high UV levels are likely, so sun protection is recommended if you plan to spend much of the day in the mountains.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
